## DETAILED ACTION

### ***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance:

The Prior Art does not fairly teach or suggest a remote, non-contact system for detecting a defect in a railroad wheel having *the combination of* a remote means, located at a first specified location in the environment surrounding the wheel for generating in a non-contact manner in said wheel an ultrasonic wave having a specified wave front, said ultrasonic wave having a direct portion and reflected and transmitted portions if said direct portion encounters a defect in said wheel, a non-contact means, located at a second specified location in the environment, for sensing from said wheel the acoustic signal emanating from the wheel that results from said ultrasonic wave traveling through the wheel, a signal processing means, responsive to said sensed acoustic signal, capable of distinguishing whether said sensed signal has a component that indicates the existence of a portion chosen from the group consisting of reflected and transmitted portions in said ultrasonic wave, wherein the presence of the component in the acoustic signal indicates the existence of a defect in said railroad wheel.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***

The prior art made of record on the attached PTO Form 892 and not relied upon is considered pertinent to applicant's disclosure.
